

Client Success Story: John and Steven

Wolverhampton Employment Service

Two of Enable's longstanding clients, John and Steven are now in regular work for the Midlands Metro Alliance. Since the beginning of June they have been working as cleaners for two hours daily, Monday to Friday, based in the main works compound. Their responsibilities include collecting rubbish from office areas, tidying kitchens, cleaning and mopping toilets and cleaning and mopping the canteen and changing areas. Both are very happy about being in work, with John saying "I feel good about working" and Steven saying "I like being in work."

Their Job Coach, Chris, is very happy with their progress. Chris said: "They have both got to grips with the routine of arriving on time and getting to work straight away." John and Steven's Business Development Officer, Jane Stringer is equally impressed and has said: "Both Steven and John were very keen to have the opportunity of working for the Metro Alliance at the Rail Safety Solutions compound on the Bilston Rd. They have both been doing really well and have quickly settled into their job roles. They have both got into a working routine very quickly and have proved themselves to be reliable and

conscientious workers."

David from Rail Safety Solutions said: "They are doing a really good job and are very pleasant and get on with everybody. We are very happy with them both."
